

SULZER

Fertilizer industry

Sulzer technologies for mass transfer equipment

40+ years of experience

Sulzer has an extensive experience in the field of fertilizer industry and it is a global market leader for components and services for separation and mixing technology in this field.

What do you need for your production plant?

- ✓ A reduction of CAPEX?
- ✓ A higher capacity?
- ✓ A reduction of fouling?
- ✓ A more robust design?
- ✓ A fast replacement?

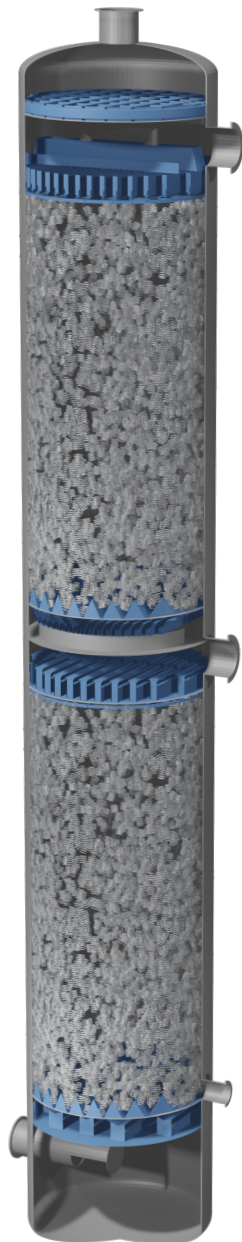

Sulzer has the solution for your needs!

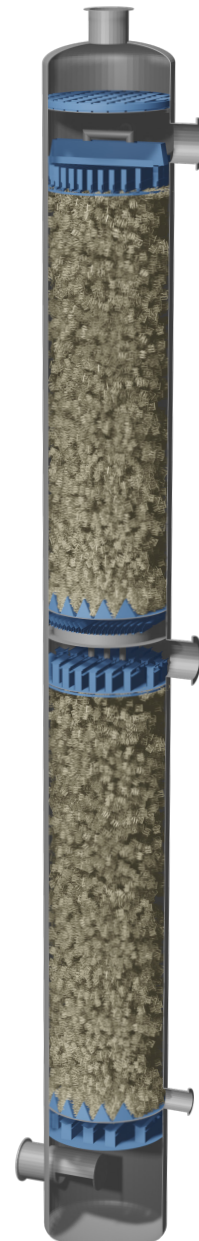

In your new column, do you want to reduce the CAPEX? Size matters!

If you are building a new column, you can plan a smaller, slimmer column when using NeXRing packing. The size of your column is reduced and your CAPEX also.

Conventional solution

NeXRing™ solution

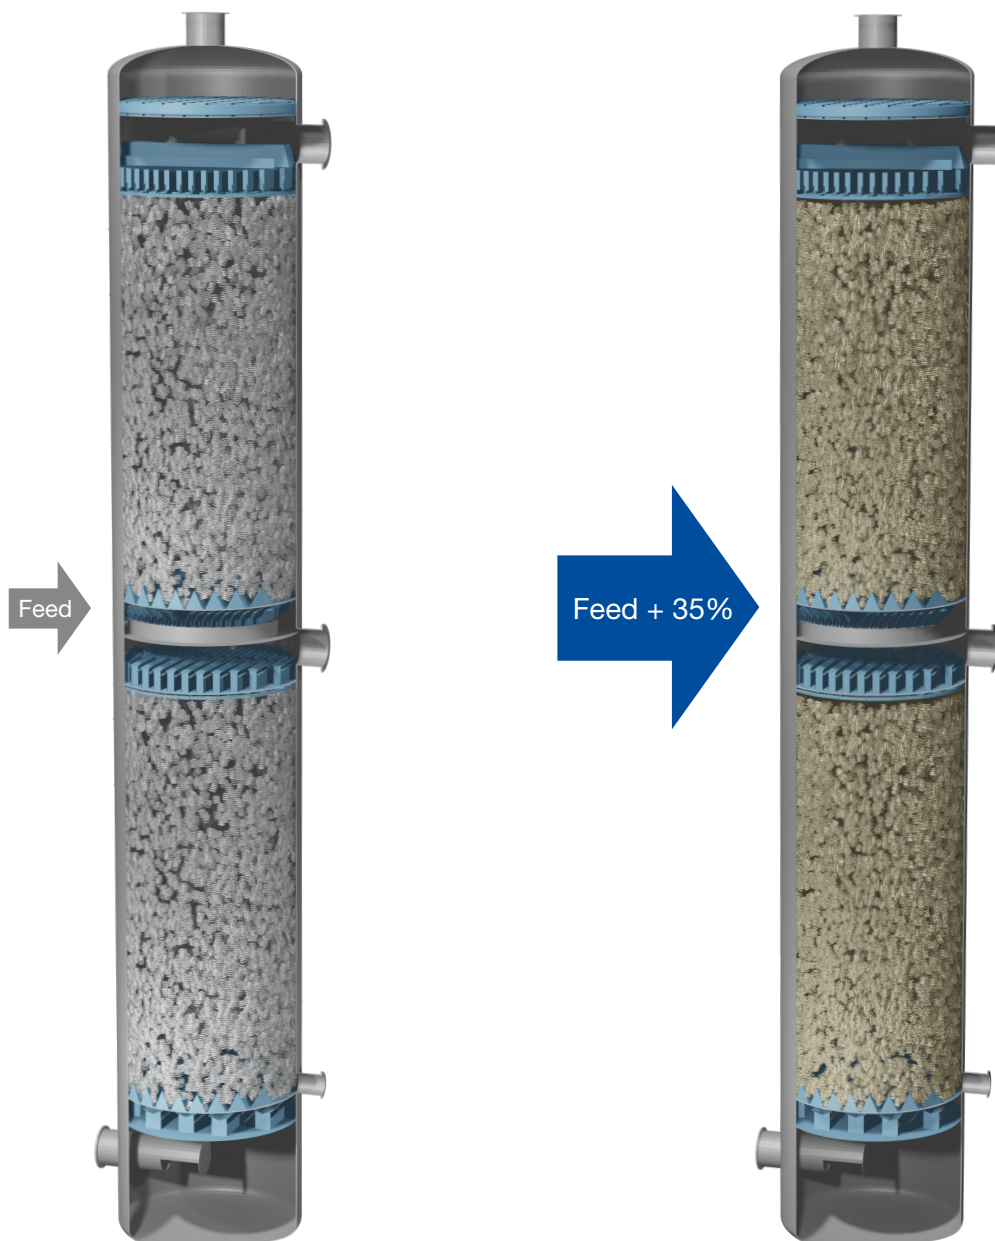

In your existing column, do you need higher capacity? **Fill it up with NeXRing™**

The capacity of your production unit can be increased up to 35% with the Sulzer's NeXRing™

Conventional solution

NeXRing™ solution

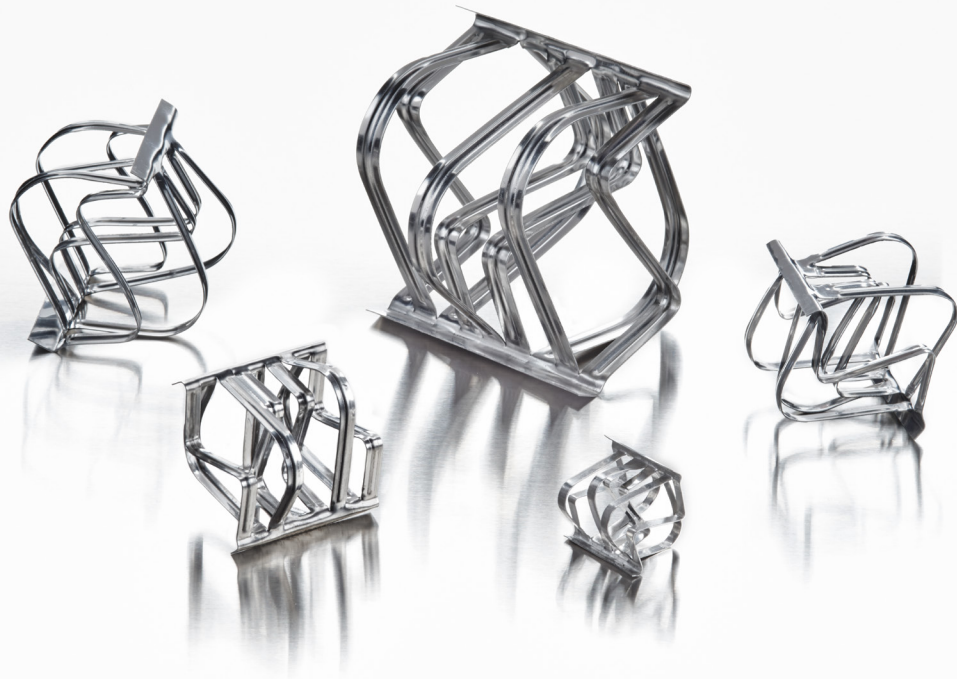

Openness is key

No ring is as open in structure as the Sulzer NeXRing™, making the NeXRing™ the best choice for fouling applications.

The combination of NeXRing™ with our anti-fouling liquid distributor technology achieves the maximum resistance to plugging.

Sulzer NeXRing™

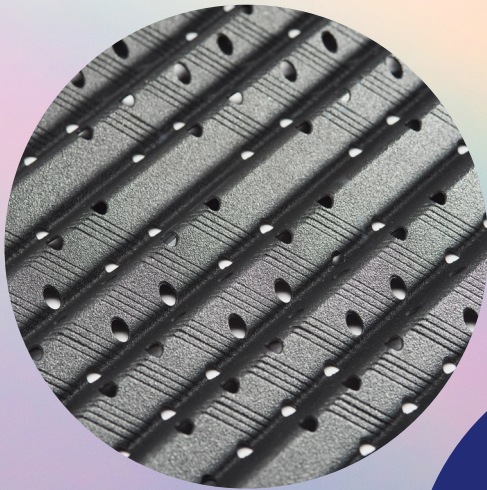

Fast replacement? Help is on the way!

Our worldwide purchasing and manufacturing network provides you with the fastest possible replacement in case of an emergency.

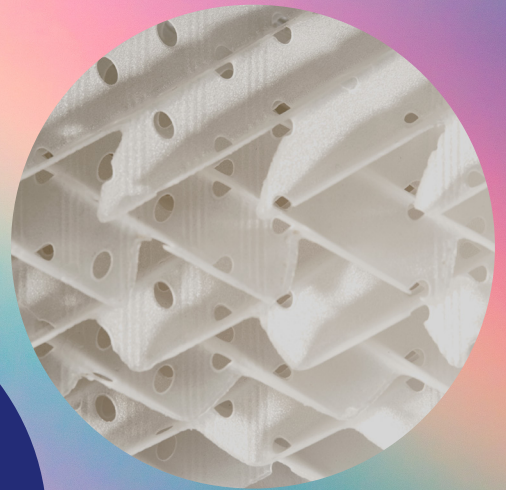

The colors of the rainbow

The Sulzer products
are available in
all sorts of materials.

Be it stainless steel,
hastelloys, plastics or
carbon fibres.

Every
corrosion problem
can be solved.

The Sulzer Chemtech division is the global market leader in innovative mass transfer, static mixing and polymer solutions for petrochemicals, refining and LNG.

Chemtech is also leading the way in ecological solutions such as biopolymers as well as textile and plastic recycling, contributing to a circular economy. Our product offering ranges from technology licensing to process components all the way to complete separation process plants. Customer support ranges from engineering and field services to tray and packing installation, tower maintenance, welding and plant turnaround projects – ensuring minimal downtime.
