

SULZER

Nuclear Service Center

Sulzer is one of the world's leading manufacturers of centrifugal pumps. We are dedicated to improving our customers' pumping processes and operational reliability.

Our customer support services team responds to industry service needs and is focused on ensuring high performance for all makes of rotating machinery. With an extensive global network of service centers, Sulzer is your ideal local service partner.

Resources and Facilities

Sulzer's Nuclear Service Center (SNSC) in Chattanooga provides state of the art solutions to the Nuclear Industry. Your project will be completed by our highly experienced staff of engineers, project managers, designers, and technicians combined with a crew of talented and dedicated craftsmen.

Parts, new equipment, repairs, upgrades and reverse engineering services and expert solutions to hydraulic, mechanical and metallurgical challenges are the special competencies of the SNSC.

For the most complex projects the Center draws on the additional worldwide resources and expertise of Sulzer's engineering and technology groups to provide industry leading solutions.

Service Expertise

- Parts, new pumps, upgrades, rerates and complete pump repairs are offered for all manufacturers and most nuclear utility pump applications.
- Sulzer assumes design, reverse engineering responsibility and certification of pumps and assemblies for most OEM's.
- The SNSC Quality Assurance Program is certified and audited to meet the requirements of
 - ASME Section III Division 1, Class 1, 2, and 3 N and NPT
 - 10CFR50 Appendix B
 - 10CFR21
 - NQA-1
 - ANSI N45.2
- Field services offered include performance diagnostics, troubleshooting, pump work oversight, hydraulic performance testing, mechanical condition monitoring and turn-key installation and repair.
- Sulzer has extensive experience reverse engineering and rapid prototype manufacturing of parts for replacement spares, complete pumps and pump repairs.
