

Perth Airport service center

Sulzer provides extensive industry expertise and process knowledge to service all your rotating equipment needs in Australia. Our conveniently located Perth Airport center is the only local service center capable of covering all your electromechanical, pump, turbine, and compressor services under one roof with state-of-the-art service equipment.

At Sulzer, we believe in not only repairing rotating equipment but upgrading it for future performance. Given our unique in-house capabilities, customers can further reduce logistical and vendor management overheads. Perth service center's skilled field personnel also engage in on-site overhauls, installation and commissioning work, machinery diagnostics, and troubleshooting.

Core competencies

- Repair and refurbishment of all types of rotating machinery regardless of the original manufacturer
- Sulzer's global network of spare parts manufacturing centers provides support for additional spare parts
- Reverse engineering and retrofits
- 24/7 emergency response

Benefits

- Consolidate all your rotating equipment service needs into one workshop
- Reduce vendor management costs with one location
- Extensive subject-matter experts able to perform all works in-house
- State-of-the-art servicing equipment
- Highest quality standards

The Perth service center is fully equipped to repair a wide range of motors and generators for customers in industries including power generation, mining, petrochemical and heavy manufacturing. The facility provides skilled technicians for inspection and maintenance, complete rotor and stator rewinds, mechanical repairs, and remanufacturing.

Resources and facilities

- Cranage up to 40 tonnes
- Balancing up to 20 tonnes
- Load testing up to 1.2 MW at 11'000 volts
- Full state-of-the-art suite of testing static and function capabilities

Service offering

- Retrofit engineering
- Part re-engineering
- Health surveys
- OEM parts supply
- Field services
- Installation and commissioning

The following certified management systems are implemented to ensure the highest quality standards:

- ISO 9001, 14001, 18001
- IEC Ex SIM S0012
- ANZEx SF 17.2001
