

## Brisbane service centre

Sulzer is your global partner with reliable and sustainable solutions for your key operations. You benefit from a local service provider with global experience in the repair and maintenance of all types of rotating equipment. In Australia, you are supported by an extensive network of seven service centres located across the country.

Discover newfound performance and longevity for your equipment at the Brisbane service centre in Queensland. The facility supports key industries locally including mining, rail, power generation and heavy manufacturing industries. Projects are completed by highly experienced engineers and technicians and are complimented by local field service engineers.

### Benefit from our comprehensive service offering

- Overhaul, repair and rewind services for a wide range of motors and generators
- Mechanical repair and overhaul of all types of pumps and turbomachinery, including gas turbine and steam turbines as well as centrifugal compressors
