Nominal current, A	31.4	19.0	15.7	12.6

## Starting method and motor protection

**XJ 80 AT:** Direct on line start (DOL 575 V) with built in AquaTronic unit, which automatically adjusts phase order by dual contactors, ensuring correct motor rotation.

Soft start (230-460 V) is built in with the AquaTronic unit, where three thyristors reduces start current to three times the nominal current. Here two relays ensures correct motor rotation.

The AquaTronic unit monitors motor temperature, by use of NTC thermistors built into stator windings, and stops the motor at high temperature. It will also stop the motor at high amperage or if a phase is missing.

**XJ 80:** Direct on line start with built in contactor. Pumps to be used with VFD must have terminal block instead of contactor. Thermal switches (140 °C/284 °F, ±5) built into the stator windings are connected to the contactor and stops the pump at high temperature.

## Power cable

20 m type H07RN8-F (standard cable):  
 4 x 4 sq.mm. (230 V)  
 4 x 2.5 sq.mm. (380-575 V)

20 m type NSSHÖU.../3E (heavy duty cable):  
 3x2.5+3x2.5/3E (380-575 V)  
 3x6+3x6/3E+3x1.5 (230 V)

\*\* Max measurement based on largest discharge size.

## Shaft seal

Double mechanical seal in oil bath.  
 Primary seal: Silicon carbide on silicon carbide.  
 Secondary seal: Silicon carbide on carbon.

## Bearings

Upper bearing: Single-row deep groove ball bearing.  
 Lower bearing: Double angular contact ball bearing.
